

System	Junk script (Bash coursework)
Author	Alex McBride
Student ID	S1715224
Student Email	AMCBRI206@caledonian.ac.uk
Date	27/10/2017
Before	<p>Create three files named file1, file2, file3, and file4 for testing, note the size of the files in KB.</p> <p><i>Note: commands to be typed are highlighted in yellow.</i></p> <ul style="list-style-type: none">• <code>cd <PROGRAM DIRECTORY></code>• <code>ls > file1</code>• <code>ls > file2</code>• <code>ls > file3</code>

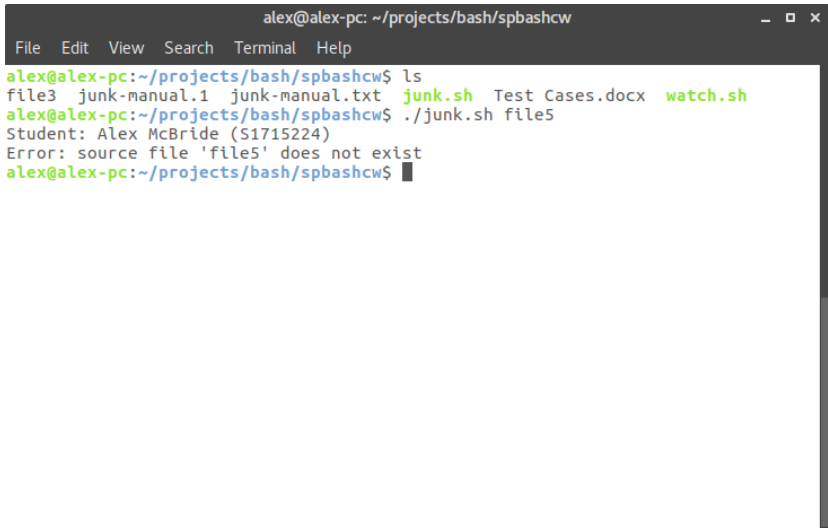

Test	001
Description	Remove junk dir and test script creates it
Input	<ul style="list-style-type: none"> • <code>rm -r ~/.junkdir</code> • Run <code>cd ~/.junkdir</code> and check that .junkdir does not exist • Run <code>./junk.sh</code> • Press 7 to exit • Run <code>cd ~/.junkdir</code> again
Expected	<ul style="list-style-type: none"> • The message "Created junk directory '/home/<USER>/junkdir'" was displayed during program execution • The directory .junkdir now exists
Actual	As expected
Screen	 <pre> alex@alex-pc: ~/.junkdir File Edit View Search Terminal Help alex@alex-pc:~/projects/bash/spbashcw\$ rm -r ~/.junkdir/ alex@alex-pc:~/projects/bash/spbashcw\$ cd ~/.junkdir bash: cd: /home/alex/.junkdir: No such file or directory alex@alex-pc:~/projects/bash/spbashcw\$./junk.sh Student: Alex McBride (51715224) Created junk directory '/home/alex/.junkdir' 1) list 3) delete 5) watch 7) exit 2) recover 4) total 6) kill option> 7 alex@alex-pc:~/projects/bash/spbashcw\$ cd ~/.junkdir alex@alex-pc:~/.junkdir\$ </pre>

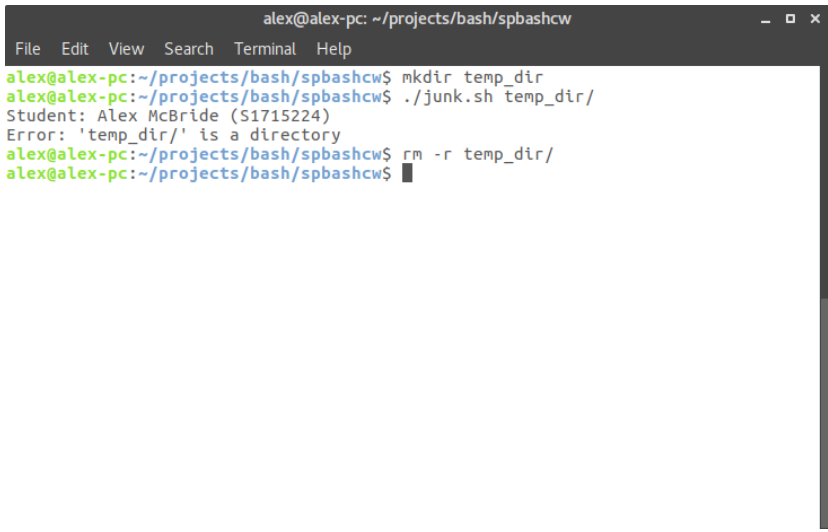

Test	002
Description	Test that selecting exit option exists program
Input	<ul style="list-style-type: none">• <code>./junk.sh</code>• Type 7 and press enter
Expected	<ul style="list-style-type: none">• The program exits cleanly.
Actual	As expected
Screen	 <pre>alex@alex-pc: ~/projects/bash/spbashcw File Edit View Search Terminal Help alex@alex-pc:~/projects/bash/spbashcw\$./junk.sh Student: Alex McBride (51715224) 1) list 3) delete 5) watch 7) exit 2) recover 4) total 6) kill option> 7 alex@alex-pc:~/projects/bash/spbashcw\$</pre>

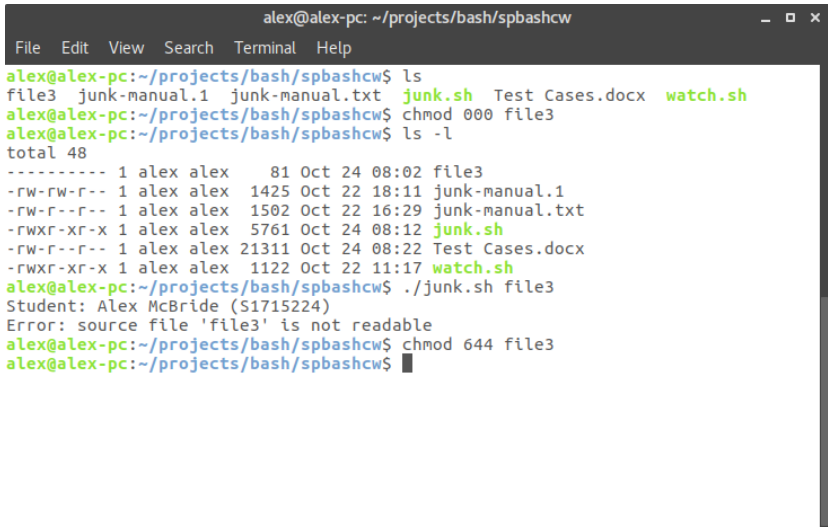

Test	003
Description	Test that interrupting process displays correct message.
Input	<ul style="list-style-type: none">• <code>./junk.sh</code>• Enter ctrl+c
Expected	<p>Message displayed:</p> <p>“Total junk files: 0 Exiting...”</p> <p><i>Note: number of files depends on number in junk dir</i></p>
Actual	As expected
Screen	 <pre>alex@alex-pc: ~/projects/bash/spbashcw File Edit View Search Terminal Help alex@alex-pc:~/projects/bash/spbashcw\$./junk.sh Student: Alex McBride (S1715224) 1) list 3) delete 5) watch 7) exit 2) recover 4) total 6) kill option> ^C Total junk files: 0 Exiting... alex@alex-pc:~/projects/bash/spbashcw\$</pre>

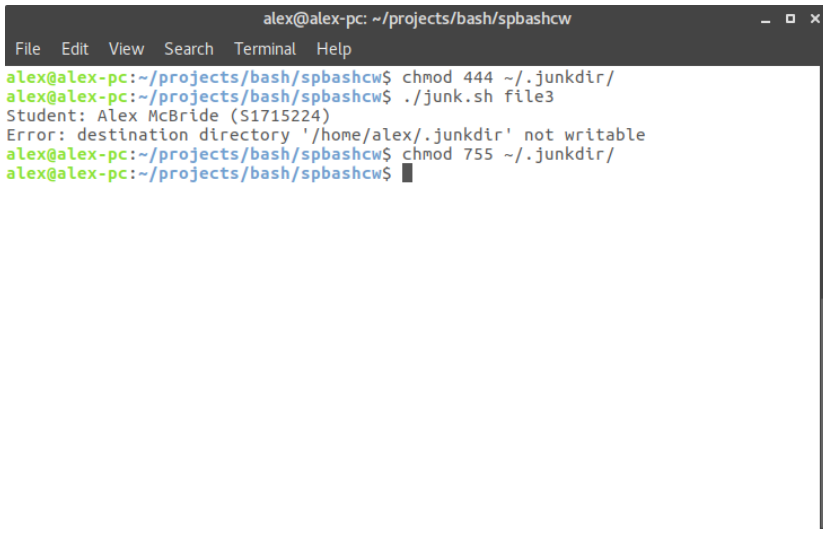

Test	004
Description	Test that junk script moves single file to junkdir
Input	<ul style="list-style-type: none"> • <code>ls</code> • <code>ls ~/.junkdir</code> • <code>./junk.sh file1</code> • <code>ls</code> • <code>ls ~/.junkdir</code>
Expected	<ul style="list-style-type: none"> • File1 is in the current directory but not in the junk directory • After junking the following message is displayed: "Junk: 1 file(s) moved to junk directory!" • The file 'file1' has been moved to the .junkdir <p><i>Note: you may get a warning about junk directory size</i></p>
Actual	As expected
Screen	 <pre> alex@alex-pc: ~/projects/bash/spbashcw File Edit View Search Terminal Help alex@alex-pc:~/projects/bash/spbashcw\$ ls file1 file3 junk-manual.txt Test Cases.docx file2 junk-manual.1 junk.sh watch.sh alex@alex-pc:~/projects/bash/spbashcw\$ ls ~/.junkdir/ alex@alex-pc:~/projects/bash/spbashcw\$./junk.sh file1 bash: /home/alex/.junk.sh: No such file or directory alex@alex-pc:~/projects/bash/spbashcw\$./junk.sh file1 Student: Alex McBride (S1715224) Junk: 1 file(s) moved to junk directory! Test	005
Description	Test that junk script displays appropriate warning when junk directory goes over 1k in size
Input	<code>./junk.sh file2</code>
Expected	Message displayed: "Warning: junk directory size greater than 1KB (12KB)" <i>Note: size may vary depending on files used</i>
Actual	As expected
Screen	 A screenshot of a terminal window titled 'alex@alex-pc: ~/projects/bash/spbashcw'. The terminal shows the command './junk.sh file2' being executed. The output is as follows: 'alex@alex-pc:~/projects/bash/spbashcw\$./junk.sh file2', 'Student: Alex McBride (S1715224)', 'Junk: 1 file(s) moved to junk directory!', 'Warning: junk directory size greater than 1KB (12KB)', and 'alex@alex-pc:~/projects/bash/spbashcw\$'. The prompt 'alex@alex-pc:' is shown in green, and the command and output are in white. The terminal has a menu bar with 'File', 'Edit', 'View', 'Search', 'Terminal', and 'Help'.

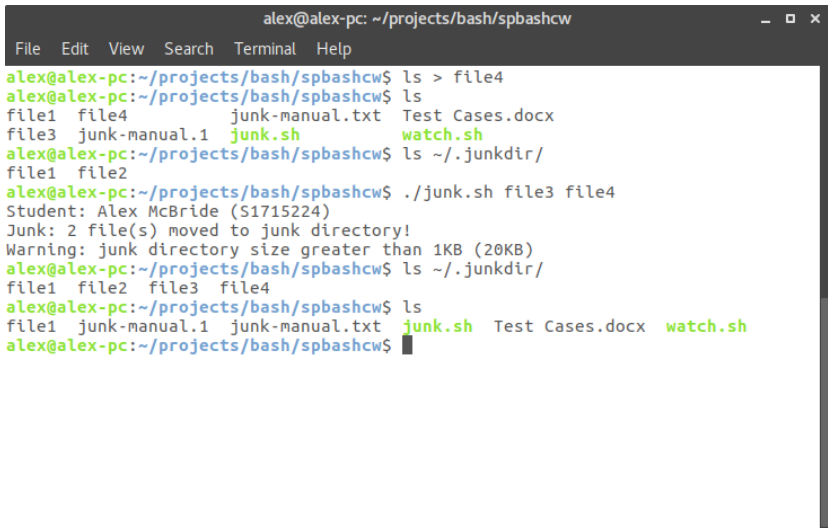

Test	006
Description	Test that junk script with missing file displays appropriate value
Input	<code>./junk.sh file5</code>
Expected	Message displayed: "Error: source file 'file5' does not exist"
Actual	As expected
Screen	 <pre>alex@alex-pc: ~/projects/bash/spbashcw File Edit View Search Terminal Help alex@alex-pc:~/projects/bash/spbashcw\$ ls file3 junk-manual.1 junk-manual.txt junk.sh Test Cases.docx watch.sh alex@alex-pc:~/projects/bash/spbashcw\$./junk.sh file5 Error: source file 'file5' does not exist alex@alex-pc:~/projects/bash/spbashcw\$</pre>

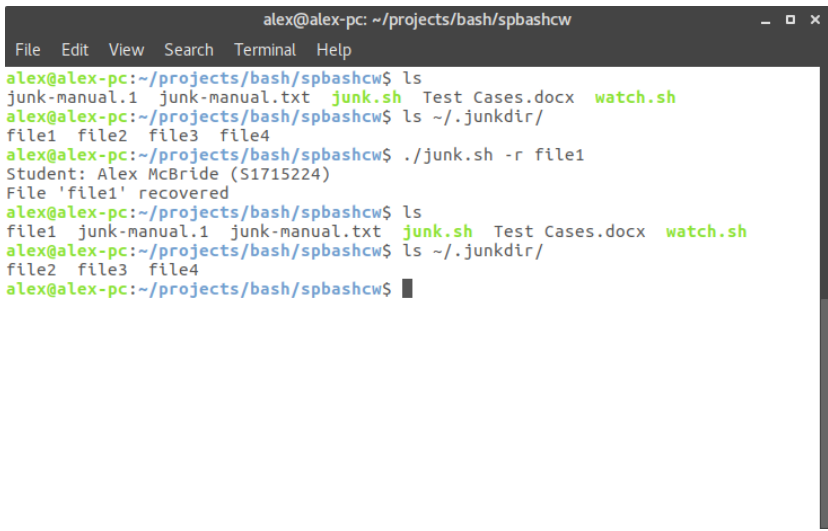

Test	007
Description	Test that junk script with directory displays appropriate message
Input	<ul style="list-style-type: none">• <code>mkdir temp_dir</code>• <code>./junk.sh temp_dir</code>• <code>rm -r temp_dir</code>
Expected	Message displayed: "Error: 'temp_dir' is a directory"
Actual	As expected
Screen	

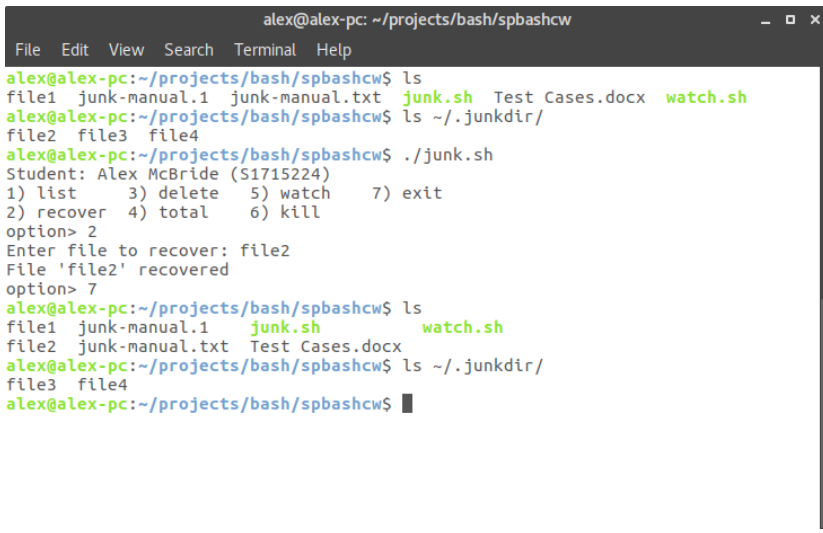

Test	008
Description	Test that junk script with file that cannot be read displays appropriate message
Input	<ul style="list-style-type: none"> • <code>chmod 000 file3</code> • <code>./junk.sh file3</code> • <code>chmod 644 file3</code>
Expected	<p>Message displayed:</p> <p>"Error: source file 'file3' is not readable"</p>
Actual	As expected
Screen	 <pre> alex@alex-pc: ~/projects/bash/spbashcw File Edit View Search Terminal Help alex@alex-pc:~/projects/bash/spbashcw\$ ls file3 junk-manual.1 junk-manual.txt junk.sh Test Cases.docx watch.sh alex@alex-pc:~/projects/bash/spbashcw\$ chmod 000 file3 alex@alex-pc:~/projects/bash/spbashcw\$ ls -l total 48 ----- 1 alex alex 81 Oct 24 08:02 file3 -rw-rw-r-- 1 alex alex 1425 Oct 22 18:11 junk-manual.1 -rw-r--r-- 1 alex alex 1502 Oct 22 16:29 junk-manual.txt -rwxr-xr-x 1 alex alex 5761 Oct 24 08:12 junk.sh -rw-r--r-- 1 alex alex 21311 Oct 24 08:22 Test Cases.docx -rwxr-xr-x 1 alex alex 1122 Oct 22 11:17 watch.sh alex@alex-pc:~/projects/bash/spbashcw\$./junk.sh file3 Student: Alex McBride (S1715224) Error: source file 'file3' is not readable alex@alex-pc:~/projects/bash/spbashcw\$ chmod 644 file3 alex@alex-pc:~/projects/bash/spbashcw\$ </pre>

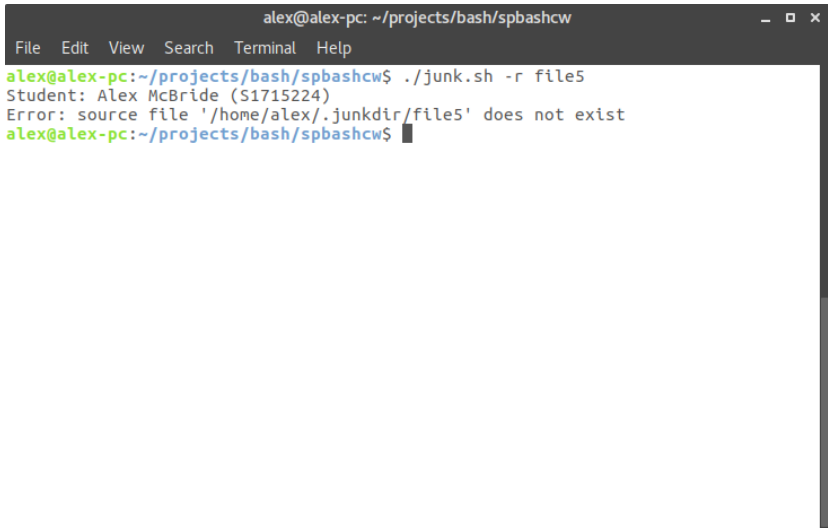

Test	009
Description	Test that junkdir not being writable displays appropriate error message
Input	<ul style="list-style-type: none">• <code>chmod 444 ~/.junkdir</code>• <code>./junk.sh file3</code>• <code>chmod 755 ~/.junkdir</code>
Expected	Message displayed: "Error: destination directory '/home/<USER>/junkdir' not writable"
Actual	As expected
Screen	

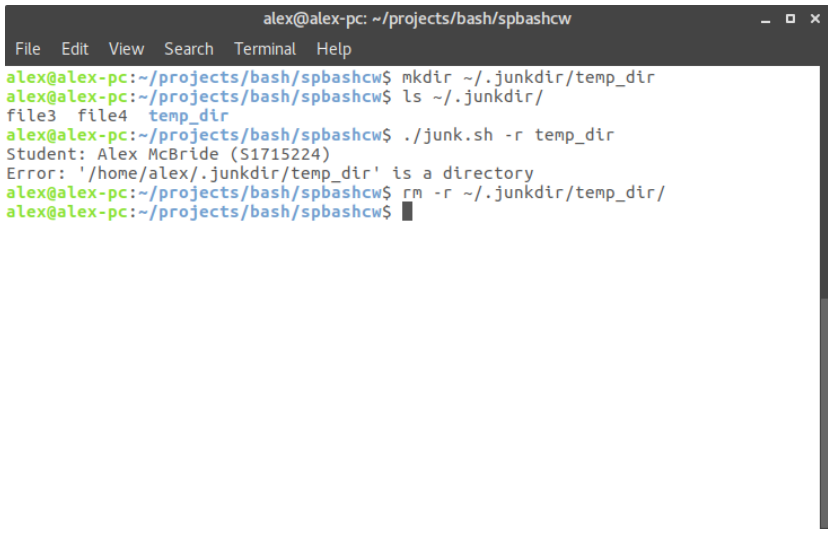

Test	010
Description	Test that file already existing in junk directory displays appropriate error message
Input	<ul style="list-style-type: none">• <code>ls > file1</code>• <code>./junk.sh file1</code>
Expected	Message displayed: "Error: destination file '/home/<USER>/junkdir/file1' already exists"
Actual	As expected
Screen	

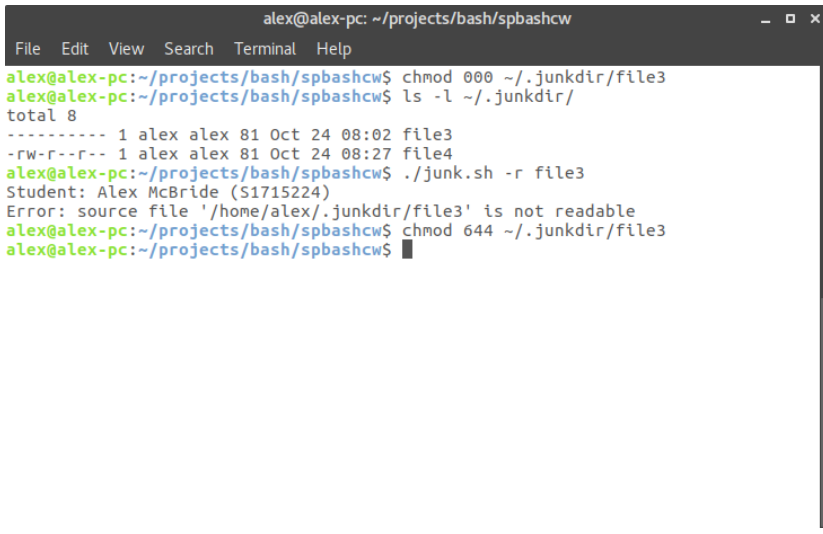

Test	011
Description	Test that junk script moves multiple files to junkdir
Input	<ul style="list-style-type: none"> • <code>ls > file4</code> • <code>./junk.sh file3 file4</code> • <code>ls ~/.junkdir</code>
Expected	<p>The following message is displayed: "Junk: 2 file(s) moved to junk directory!"</p> <p>The files 'file1' 'file2', 'file3', and 'file 4' are displayed in the .junkdir</p>
Actual	As expected
Screen	 <pre> alex@alex-pc: ~/projects/bash/spbashcw File Edit View Search Terminal Help alex@alex-pc:~/projects/bash/spbashcw\$ ls > file4 alex@alex-pc:~/projects/bash/spbashcw\$ ls file1 file4 junk-manual.txt Test Cases.docx file3 junk-manual.1 junk.sh watch.sh alex@alex-pc:~/projects/bash/spbashcw\$ ls ~/.junkdir/ file1 file2 alex@alex-pc:~/projects/bash/spbashcw\$./junk.sh file3 file4 Student: Alex McBride (S1715224) Junk: 2 file(s) moved to junk directory! Test	012
Description	Test that recover switch moves file back from junkdir
Input	<ul style="list-style-type: none"> • <code>./junk.sh -r file1</code> • <code>ls</code> • <code>ls ~/.junkdir</code>
Expected	<ul style="list-style-type: none"> • The following message is displayed: "File 'file1' recovered" • The file 'file1' is displayed in current directory • The file 'file1' has disappeared from junkdir
Actual	As expected
Screen	 <pre> alex@alex-pc: ~/projects/bash/spbashcw File Edit View Search Terminal Help alex@alex-pc:~/projects/bash/spbashcw\$ ls junk-manual.1 junk-manual.txt junk.sh Test Cases.docx watch.sh alex@alex-pc:~/projects/bash/spbashcw\$ ls ~/.junkdir/ file1 file2 file3 file4 alex@alex-pc:~/projects/bash/spbashcw\$./junk.sh -r file1 Student: Alex McBride (S1715224) File 'file1' recovered alex@alex-pc:~/projects/bash/spbashcw\$ ls file1 junk-manual.1 junk-manual.txt junk.sh Test Cases.docx watch.sh alex@alex-pc:~/projects/bash/spbashcw\$ ls ~/.junkdir/ file2 file3 file4 alex@alex-pc:~/projects/bash/spbashcw\$ </pre>

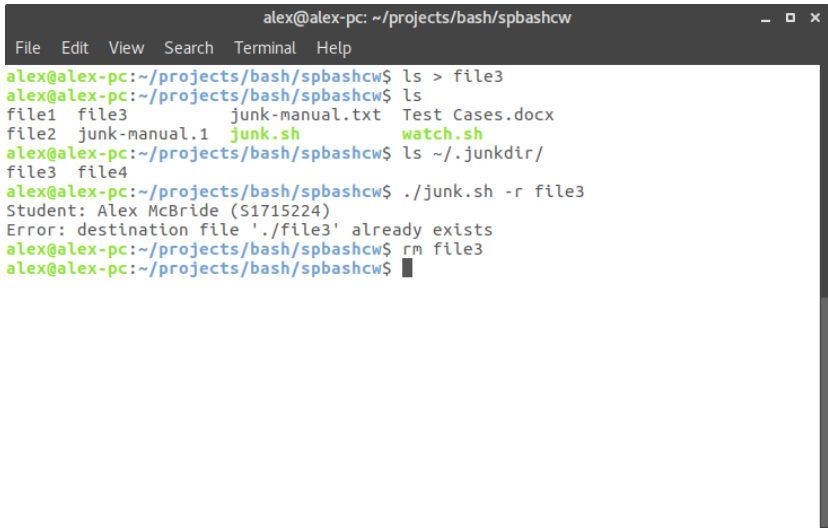

Test	013
Description	Test that recover with prompt moves file back from junkdir
Input	<ul style="list-style-type: none"> • <code>./junk.sh</code> • Select 2 from menu • Type 'file2' and press enter • Select 7 to exit • <code>ls</code> • <code>ls ~/.junkdir</code>
Expected	<ul style="list-style-type: none"> • The following message is displayed: "File 'file2' recovered" • The file 'file2' is displayed in current directory • The file 'file2' has been removed from junkdir
Actual	As expected
Screen	 <pre> alex@alex-pc: ~/projects/bash/spbashcw File Edit View Search Terminal Help alex@alex-pc:~/projects/bash/spbashcw\$ ls file1 junk-manual.1 junk-manual.txt junk.sh Test Cases.docx watch.sh alex@alex-pc:~/projects/bash/spbashcw\$ ls ~/.junkdir/ file2 file3 file4 alex@alex-pc:~/projects/bash/spbashcw\$./junk.sh Student: Alex McBride (S1715224) 1) list 3) delete 5) watch 7) exit 2) recover 4) total 6) kill option> 2 Enter file to recover: file2 File 'file2' recovered option> 7 alex@alex-pc:~/projects/bash/spbashcw\$ ls file1 junk-manual.1 junk.sh watch.sh file2 junk-manual.txt Test Cases.docx alex@alex-pc:~/projects/bash/spbashcw\$ ls ~/.junkdir/ file3 file4 alex@alex-pc:~/projects/bash/spbashcw\$ </pre>

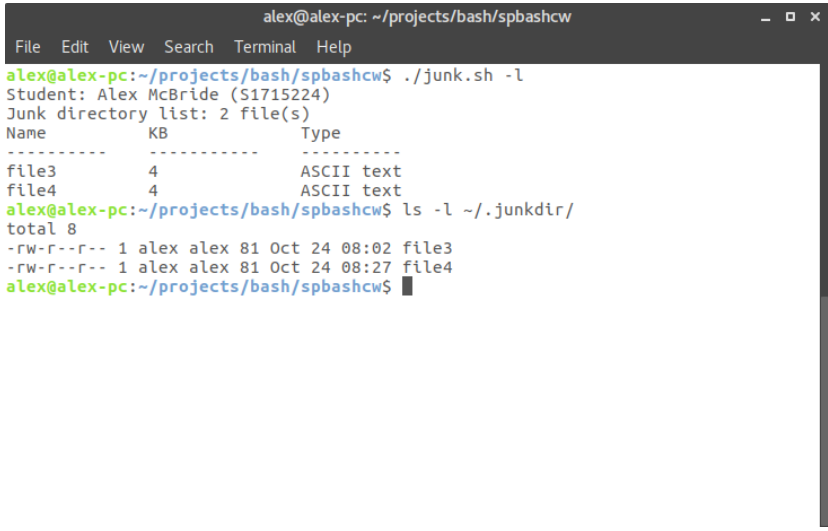

Test	014
Description	Test that recovering file when file does not exist displays appropriate error
Input	<code>./junk.sh -r file5</code>
Expected	Message displayed: "Error: source file '/home/<USER>/junkdir/file5' does not exist"
Actual	As expected
Screen	 A screenshot of a terminal window titled 'alex@alex-pc: ~/projects/bash/spbashcw'. The terminal shows the command <code>alex@alex-pc:~/projects/bash/spbashcw\$./junk.sh -r file5</code> being executed. The output is: <code>Student: Alex McBride (S1715224)</code> followed by <code>Error: source file '/home/alex/.junkdir/file5' does not exist</code> . The prompt then returns to <code>alex@alex-pc:~/projects/bash/spbashcw\$</code> .

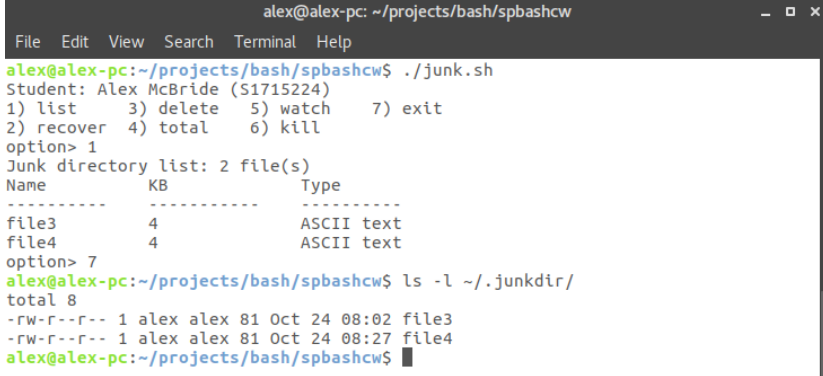

Test	015
Description	Test that recover with directory displays appropriate message
Input	<ul style="list-style-type: none">• <code>mkdir ~/.junk_dir/temp_dir</code>• <code>./junk.sh -r temp_dir</code>• <code>rm -r ~/.junk_dir/temp_dir</code>
Expected	Message displayed: "Error: '/home/<USER>/junkdir/temp_dir' is a directory"
Actual	As expected
Screen	

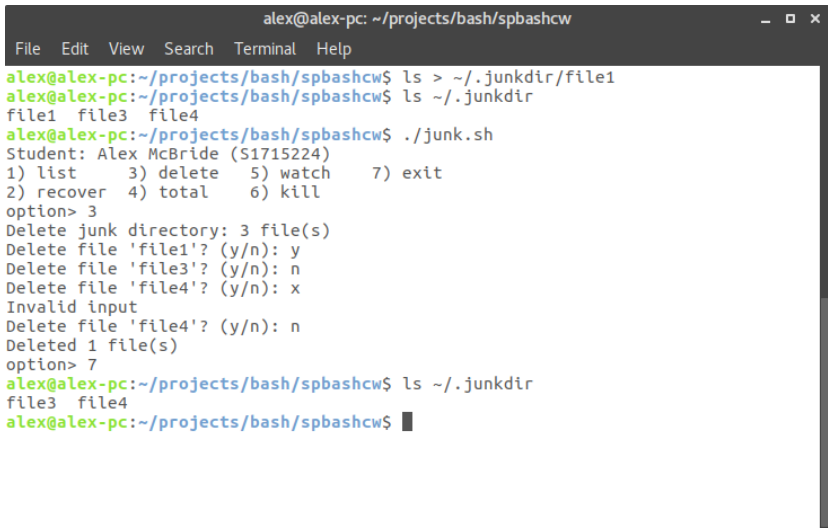

Test	016
Description	Test that recover with file that cannot be read displays appropriate message
Input	<ul style="list-style-type: none">• <code>chmod 000 ~/.junkdir/file3</code>• <code>./junk.sh -r file3</code>• <code>chmod 644 ~/.junkdir/file3</code>
Expected	Message displayed: "Error: source file '/home/<USER>/junkdir/file3' is not readable"
Actual	As expected
Screen	

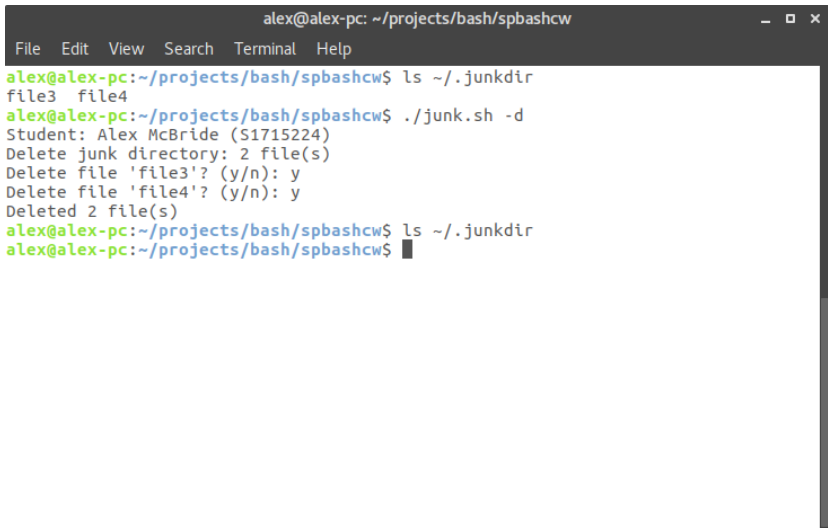

Test	017
Description	Test that recover when destination directory not writable displays appropriate error message
Input	<ul style="list-style-type: none">• <code>chmod 444 .</code>• <code>./junk.sh -r file3</code>• <code>chmod 755 .</code>
Expected	Message displayed: "Error: destination directory '.' not writable"
Actual	As expected
Screen	 <pre>alex@alex-pc: ~/projects/bash/spbashcw File Edit View Search Terminal Help alex@alex-pc:~/projects/bash/spbashcw\$ ls -a . file1 .git junk-manual.txt .~st Cases.docx watch.sh .. file2 junk-manual.1 junk.sh Test Cases.docx alex@alex-pc:~/projects/bash/spbashcw\$ chmod 544 . alex@alex-pc:~/projects/bash/spbashcw\$./junk.sh -r file3 Student: Alex McBride (S1715224) Error: destination directory '.' not writable alex@alex-pc:~/projects/bash/spbashcw\$ chmod 755 . alex@alex-pc:~/projects/bash/spbashcw\$</pre>

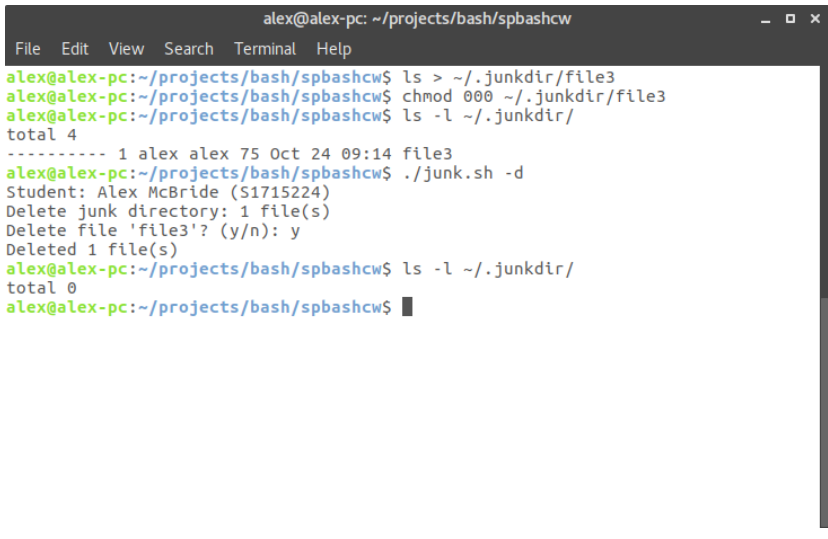

Test	018
Description	Test that recover when file already exists displays appropriate error
Input	<ul style="list-style-type: none">• <code>ls > ./junkdir/file3</code>• <code>./junk.sh -r file3</code>
Expected	Message displayed: "Error: destination file './file3' already exists"
Actual	As expected
Screen	 <p>The screenshot shows a terminal window titled 'alex@alex-pc: ~/projects/bash/spbashcw'. The terminal output is as follows:</p> <pre>alex@alex-pc:~/projects/bash/spbashcw\$ ls > file3 alex@alex-pc:~/projects/bash/spbashcw\$ ls file1 file3 junk-manual.txt Test Cases.docx file2 junk-manual.1 junk.sh watch.sh alex@alex-pc:~/projects/bash/spbashcw\$ ls ~/.junkdir/ file3 file4 alex@alex-pc:~/projects/bash/spbashcw\$./junk.sh -r file3 Student: Alex McBride (S1715224) Error: destination file './file3' already exists alex@alex-pc:~/projects/bash/spbashcw\$ rm file3 alex@alex-pc:~/projects/bash/spbashcw\$</pre>

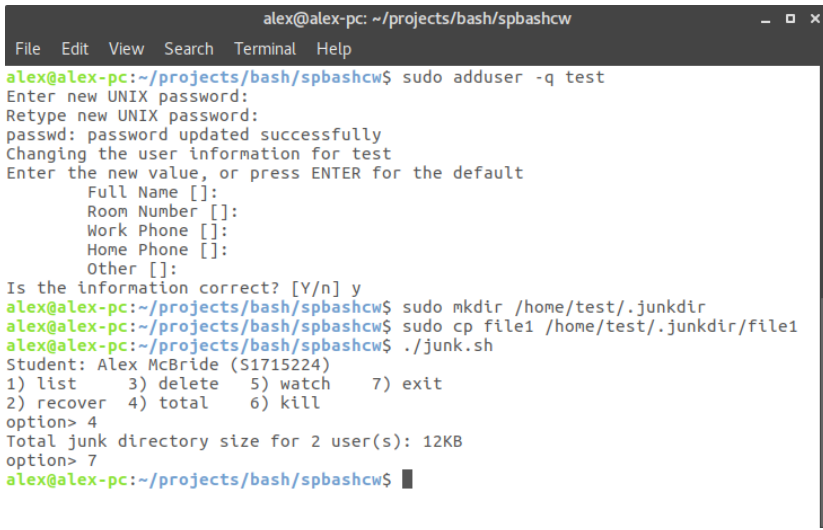

Test	019
Description	Test that list switch (-l) lists contents of junkdir
Input	<ul style="list-style-type: none"> • <code>./junk.sh -l</code> • <code>ls -l ~/.junkdir</code>
Expected	<p>The following output is displayed:</p> <pre>Junk directory list: 2 file(s) Name KB Type ----- file3 4 ASCII text file4 4 ASCII text</pre> <p>That matches the output of ls:</p> <pre>total 8 -rw-r--r-- 1 alex alex 81 Oct 24 08:02 file3 -rw-r--r-- 1 alex alex 81 Oct 24 08:27 file4</pre> <p><i>Note: the bytes in files may vary depending on the files used</i></p>
Actual	As expected
Screen	 <p>The screenshot shows a terminal window titled 'alex@alex-pc: ~/projects/bash/spbashcw'. The user runs <code>./junk.sh -l</code>, which outputs 'Junk directory list: 2 file(s)' followed by a table of files. Then, the user runs <code>ls -l ~/.junkdir/</code>, which outputs the same table of files. The output is as follows:</p> <pre>alex@alex-pc:~/projects/bash/spbashcw\$./junk.sh -l Student: Alex McBride (S1715224) Junk directory list: 2 file(s) Name KB Type ----- file3 4 ASCII text file4 4 ASCII text alex@alex-pc:~/projects/bash/spbashcw\$ ls -l ~/.junkdir/ total 8 -rw-r--r-- 1 alex alex 81 Oct 24 08:02 file3 -rw-r--r-- 1 alex alex 81 Oct 24 08:27 file4 alex@alex-pc:~/projects/bash/spbashcw\$</pre>

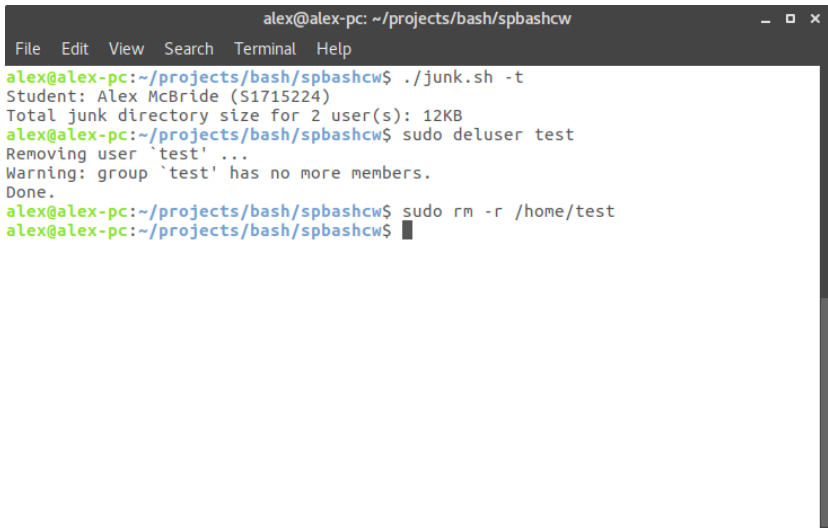

Test	020
Description	Test that list menu option lists contents of junkdir
Input	<ul style="list-style-type: none"> • <code>./junk.sh</code> • Select 1 from menu and press enter • Select 7 to exit • <code>ls -l ~/.junkdir</code>
Expected	<p>The following output is displayed:</p> <pre>Junk directory list: 2 file(s) Name KB Type ----- file3 4 ASCII text file4 4 ASCII text</pre> <p>That matches the output of:</p> <pre>total 8 -rw-r--r-- 1 alex alex 81 Oct 24 08:02 file3 -rw-r--r-- 1 alex alex 81 Oct 24 08:27 file4</pre> <p><i>Note: the bytes in files may vary depending on the files used</i></p>
Actual	As expected
Screen	 <p>The screenshot shows a terminal window titled 'alex@alex-pc: ~/projects/bash/spbashcw'. The user runs <code>./junk.sh</code>, which displays a menu with options: 1) list, 2) recover, 3) delete, 4) total, 5) watch, 6) kill, and 7) exit. The user selects option 1, which shows the 'Junk directory list' for 2 files. Then, the user selects option 7 to exit. Finally, the user runs <code>ls -l ~/.junkdir/</code>, which shows the same directory listing as expected.</p>

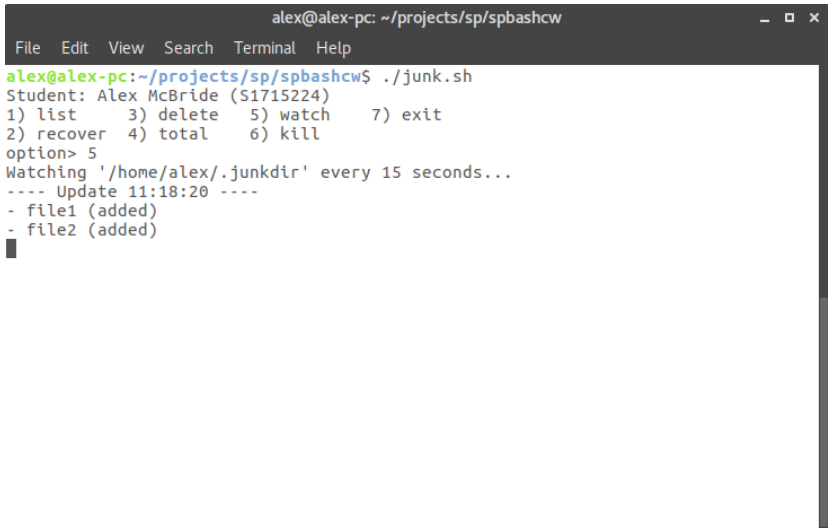

Test	021
Description	Test that delete option interactively deletes files
Input	<ul style="list-style-type: none"> • Create a file1 if it doesn't exist <code>ls > ~/.junkdir/file1</code> • <code>./junk.sh</code> • Select option 3 and press enter • Enter 'y' when asked to delete file1 • Enter 'n' when asked to delete file3 • Enter 'x' when asked to delete file4 • Enter 'n' when asked to delete file3 again • Enter 7 to exit • <code>ls ~/.junkdir</code>
Expected	<ul style="list-style-type: none"> • The file 'file1' should be removed from junkdir • The file 'file3' should still be present in junkdir • The message 'Invalid input' should be displayed for 'x' • The file 'file4' should remain in junkdir • The message "Deleted 1 file(s)" should be displayed before exit of script
Actual	As expected

Test	026
Description	Test that watch script is started from menu option
Input	<ul style="list-style-type: none">• <code>./junk.sh</code>• Type 5 and press enter
Expected	The watch command for the junkdir is displayed. <i>Note: press ctrl+c to exit</i>
Actual	As expected
Screen	 <pre>alex@alex-pc: ~/projects/sp/spbashcw File Edit View Search Terminal Help alex@alex-pc:~/projects/sp/spbashcw\$./junk.sh Student: Alex McBride (S1715224) 1) list 3) delete 5) watch 7) exit 2) recover 4) total 6) kill option> 5 Watching '/home/alex/.junkdir' every 15 seconds... ---- Update 11:18:20 ---- - file1 (added) - file2 (added)</pre>

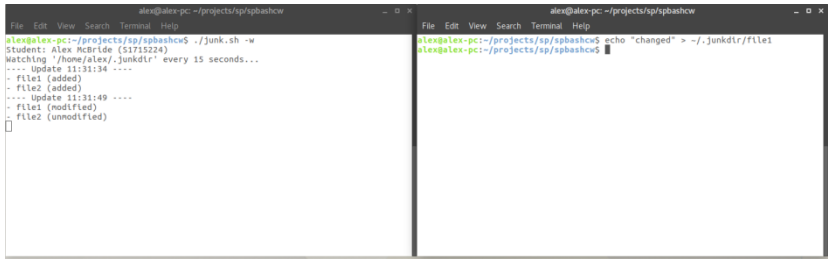

Test	027
Description	Test that watch script is started from switch (-w)
Input	<code>./junk.sh -w</code>
Expected	The watch command for the junkdir is displayed. <i>Note: press ctrl+c to exit</i>
Actual	As expected
Screen	 <pre>alex@alex-pc: ~/projects/sp/spbashcw File Edit View Search Terminal Help alex@alex-pc:~/projects/sp/spbashcw\$./junk.sh -w Student: Alex McBride (S1715224) Watching '/home/alex/.junkdir' every 15 seconds... ---- Update 11:18:45 ---- - file1 (added) - file2 (added)</pre>

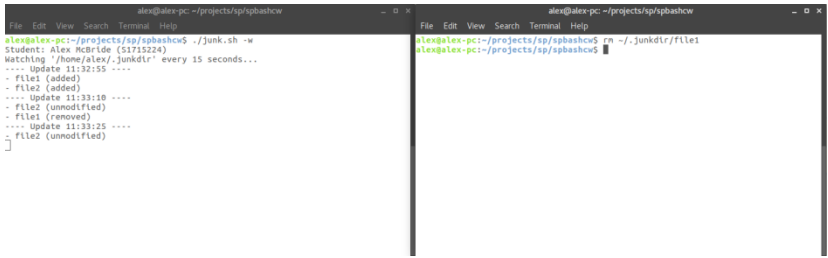

Test	028
Description	Test that watch script can be killed with the kill menu option
Input	<ul style="list-style-type: none"> Run <code>./junk.sh -w</code> in first terminal In second terminal run: <code>./junk.sh</code> Type 6 and press enter Type 7 and press enter to exit
Expected	<ul style="list-style-type: none"> The watch command running in the first terminal is stopped and you are returned to the prompt. In the second terminal the message is displayed: "Stopping watch.sh script (PID: <PID>)"
Actual	As expected
Screen	 <p>The image shows two terminal windows side-by-side. The left window shows the execution of <code>./junk.sh -w</code> which starts a watch loop. The right window shows the execution of <code>./junk.sh</code> which displays a menu. Option 6 is selected, resulting in the message "Stopping watch.sh script (PID: 18819)".</p> <pre> alex@alex-pc: ~/projects/sp/spbashcw File Edit View Search Terminal Help alex@alex-pc:~/projects/sp/spbashcw\$./junk.sh -w Student: Alex McBride (51715224) Watching '/home/alex/.junkdir' every 15 seconds... ---- Update 11:18:45 ---- - file1 (added) - file2 (added) ---- Update 11:19:00 ---- - file1 (unmodified) - file2 (unmodified) ---- Update 11:19:15 ---- - file1 (unmodified) - file2 (unmodified) ./junk.sh: line 195: 18819 Terminated ./watch.sh \$JUNK_DIR alex@alex-pc:~/projects/sp/spbashcw\$ alex@alex-pc:~/projects/sp/spbashcw File Edit View Search Terminal Help alex@alex-pc:~/projects/sp/spbashcw\$./junk.sh Student: Alex McBride (51715224) 1) list 3) delete 5) watch 7) exit 2) recover 4) total 6) kill option> 6 Stopping watch.sh script (PID: 18819) option> </pre>

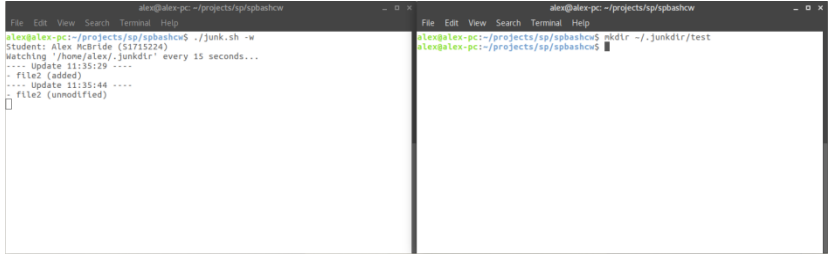

Test	029
Description	Test that watch script can be killed with a switch (-k)
Input	<ul style="list-style-type: none"> Run <code>./junk.sh -w</code> in first terminal In second terminal run: <code>./junk.sh -k</code>
Expected	<ul style="list-style-type: none"> The watch command running in the first terminal is stopped and you are returned to the prompt. In the second terminal the message is displayed: "Stopping watch.sh script (PID: <PID>)"
Actual	As expected
Screen	 <p>The image shows two terminal windows side-by-side. The left window shows the execution of <code>./junk.sh -w</code>, which starts a watch loop. The right window shows the execution of <code>./junk.sh -k</code>, which sends a signal to the first terminal, resulting in the message "Stopping watch.sh script (PID: 19219)".</p> <pre> alex@alex-pc: ~/projects/sp/spbashcw File Edit View Search Terminal Help alex@alex-pc:~/projects/sp/spbashcw\$./junk.sh -w Student: Alex McBride (51715224) Watching '/home/alex/.junkdir' every 15 seconds... ---- Update 11:21:10 ---- - file1 (added) - file2 (added) ./junk.sh: line 195: 19219 Terminated ./watch.sh \$JUNK_DIR alex@alex-pc:~/projects/sp/spbashcw\$ alex@alex-pc: ~/projects/sp/spbashcw File Edit View Search Terminal Help alex@alex-pc:~/projects/sp/spbashcw\$./junk.sh -k Student: Alex McBride (51715224) Stopping watch.sh script (PID: 19219) alex@alex-pc:~/projects/sp/spbashcw\$ </pre>

Test	030
Description	Test that watch script updates correctly when file added. For this test start two terminal windows and run <code>./junk.sh -w</code> in the first one. Make sure junkdir is empty (<code>rm * ~/.junkdir</code>).
Input	<code>echo "file1" > ~/.junkdir/file1</code>
Expected	The watch script updates the message "- file1 (added)" is displayed
Actual	As expected
Screen	 The screenshot shows two terminal windows side-by-side. The left window displays the output of the watch script, which includes the student's name, a warning about junkdir, and a series of updates showing the file being added. The right window shows the command being executed to create the file.

Test	031
Description	Test that watch script updates correctly when second file added.
Input	<code>echo "file2" > ~/.junkdir/file2</code>
Expected	The watch script updates the message "- file2 (added)" is displayed
Actual	As expected
Screen	 <p>The screenshot displays two terminal windows side-by-side. The left window shows the output of a 'watch' command monitoring a directory. It lists 'file1 (added)' and 'file1 (unmodified)'. The right window shows the same terminal after the command 'echo "file2" > ~/.junkdir/file2' has been executed, with the output now including 'file2 (added)'.</p>

Test	032
Description	Test that watch script updates correctly when files are modified.
Input	<code>echo "changed" > ~/.junkdir/file1</code>
Expected	The watch script updates with the message: - file1 (modified) - file2 (unmodified)
Actual	As expected
Screen	 <pre>alex@alex-pc: ~/projects/sp/spbashow File Edit View Search Terminal Help alex@alex-pc:~/projects/sp/spbashow\$./junk.sh -w Student: Alex McBride (51715224) Watching '/home/alex/.junkdir' every 15 seconds... ---- Update 11:31:34 ---- - file1 (added) - file2 (added) ---- Update 11:31:49 ---- - file1 (modified) - file2 (unmodified)</pre> <pre>alex@alex-pc:~/projects/sp/spbashow File Edit View Search Terminal Help alex@alex-pc:~/projects/sp/spbashow\$ echo "changed" > ~/.junkdir/file1 alex@alex-pc:~/projects/sp/spbashow\$</pre>

Test	033
Description	Test that watch script updates correctly when files are modified.
Input	<code>echo "changed" > ~/.junkdir/file1</code>
Expected	The watch script updates with the message: - file1 (modified) - file2 (unmodified)
Actual	As expected
Screen	

Test	034
Description	Test that watch script ignored directories
Input	<code>mkdir > ~/.junkdir/test</code>
Expected	The watch script updates with the message: - file2 (unmodified)
Actual	As expected
Screen	 <p>The screenshot displays two terminal windows side-by-side. The left window shows the output of a watch script running in a terminal. The output includes the command 'alex@alex-pc: ~/projects/sp/spbashow', the student's name 'Student: Alex McBride (51715224)', and the message 'Watching "/home/alex/.junkdir" every 15 seconds...'. It then shows a series of updates: '---- Update 11:35:29 ----', '- file2 (added)', '---- Update 11:35:44 ----', and '- file2 (unmodified)'. The right window shows the same terminal after the command 'mkdir ~/.junkdir/test' has been executed, with the output showing 'alex@alex-pc: ~/projects/sp/spbashow\$ mkdir ~/.junkdir/test' and 'alex@alex-pc: ~/projects/sp/spbashow\$'.</p>
